Main Program:

```java
import java.util.*;

class Abc
{   String name;
    int age;
    public Abc(String s,int a )
    {
        name=s;
        age=a;
    }
    public void display(Abc obj)
    {
        System.out.println("The name is"+obj.name);
        System.out.println("The age is"+obj.age);
    }
    public void show()
    {display(this);}

    public static Abc create()
    {
        Abc obj2=new Abc("Ram",18);

        return obj2;
    }
}
class Main
{
    public static void main(String [] args)
    {
        Scanner sc=new Scanner(System.in);
        String a;
        int b;

        System.out.println("Enter your name");
        a=sc.nextLine();
        System.out.println("Enter your age");
        b=sc.nextInt();

        Abc obj1=new Abc(a,b);
        obj1.show();
        Abc obj2=Abc.create();
```

```
        obj2.show();

    }
}
```

Output:
Enter your name
Shyam
Enter your age
19
The name isShyam
The age is19
The name isRam
The age is18
