**Main Class:**

```java
import java.util.*;
import myPack.packDemo;

public class Main
{

    public static void main(String [] args)
    {
                packDemo d1=new packDemo();

                d1.show();

    }
}
```

**Package :**

```java
package myPack;

public class packDemo
{
        public void show()
        {System.out.println("This is show function in package");}

}
```

**Output:**
This is show function in package
